magic fairies, pixies, imps and trolls  
are in the medicine chest  
they're playing around with my dosage  
they're messing with my head

they want me to do their will  
so they're hiding all my pills

they wake me up at four a.m.  
talking loudly under the bed  
they say they got big plans for me  
and i'll get away scott free

i hear them when i hold a knife  
they want me to stab my wife

they've made a list of all the people they want dead  
they want me to take a pipe and wrap it around their  
heads
