Frozen streams and vapours gray,  
Cold and waste the landscape lay...  
Then a hale of wind  
Hither - whirling, Thither - swirling,  
Spinn the fog and spinn the mist...  
Still we walked on through woods and wintry gray,  
Home through woods where winter lay - cold and  
dark...  
(Waiting for a change in the weather  
Waiting for a shift in the air  
Could we get there together, ever?  
Waiting for our late, late return)  
Through the woods, home through the woods where  
winter lay...
