(s. macdonald)

A close encounter a combined iq of thirteen
Time spent memorizing the paint on the walls
Move it outside a hint of lemon and protein
There's no slowing down the swimmers at all

And then it was over and done that's it
And then it was over and done that's it

There was a problem the solution a problem again
The other side set on laissez faire
A crack in the image another form to amend
If a tree fell in the forest would anyone care?

And then it was over and done that's it
And then it was over and done that's it

Get out your instruments and play a sour suite
Cue the credits and fade to black
Round up the horses and make a hasty retreat
And pray to yourself that it's not coming back

Because it is over and done that's it
Because it is over and done that's it
