(w graber)

The pit of fear and the roots of fools  
I took the lies and made them rules  
If it is over why do I doubt  
If you don't feel then let me out

You can't become a different you  
Why did I think instead of do  
With all there is to lose or gain  
Why do I only see the pain

'cause I feel. . . feel. . . I feel. . . feel. . . unknown. . .  
unknown

I have no pride for what's been done  
I fought the war that no one won  
I'm guilty of the guilt unclear  
I only wish that you were here

A fenceless sky for the first time  
I could not recognize the sign  
It's how it feels like getting old  
I hope the universe ain't cold

'cause I feel. . . feel. . . I feel. . . feel. . . unknown. . .  
unknown
