

## Arcturus "Wintry Grey"

Frozen streams and vapours gray,  
cold and waste the landscape lay...  
Then a hale of wind.

Hither-Whirling, Thither-Swilrling,  
Spin the fog and spin the mist...  
Still we walked on through woods and wintry gray,  
home through woods where winter lay - Cold and  
dark...  
(Waiting for a change in the weather.  
Waiting for a shift in the air.  
Could we get there together, ever?  
Waiting for our late, late return)

Through the woods. Home through the woods where  
winter lay...
