Ony by one we fall to the ground
We turn our heads and start from
Where we were found, on our knees
Hold your head from movin' around
Your eyes are fixed on something
That you have found, it's not for me
(chorus)
Any if you say wash the rain
Do you mean was the pain from me
My eyes are tearin', my mouth is dry
A look of desperation lives in my eyes
Let me be
Blindfold the sun with the clouds that we breathe
Under the veil lies beauty that we don't see
Please set me free
(chorus)
Listen to the sounds of songs from an angel
Wrecked on the shores of time hurting my mind
Let me be (mama cries for me)
Ony by one we fall to the ground
We turn our heads and start from
Where we were found, on our knees
(chorus)
