(w. graber)

Look for answers you've never gotten
You knew them once but now they're forgotten
So you go
And you want me to see how to see
You don't want me to feel all alone
And you want to believe I'll believe
But I'll never believe that at all

[chorus]

Have you found the time
Is it just another lie - is it just another lie?
And time is time is time this time

And you tell me to lighten up now
I'm much too serious about it all
And you know
I can understand what you say
Day by day when there's no other way
But I wish you could feel what I feel
Cause you'd never say that again

[chorus]

There ain't no reason why
There ain't no reason why
