(w. graber)

And everybody wants to know somehow (just don't ask  
me for the truth)

And change is change but that ain't wisdom

An endless track of endless tracks - pretend

And never leave this track once it begins

[chorus]

Explanations, expectations - I'll find some other way

No here's how to help hallucinations - it's just from day  
to day

And junior finds some strange salvation - I'd say he's  
wrong

'cause maybe when it's all done - this is just a song

If no one knows then how can they be wrong

Deplete it all it seems before to long

Insanity - a blink ten thousand years

Insanity - well there is nothing here

[chorus]

Today it seems some wounds will never mend

A simple thought but clouds of doubt again

[chorus]
