I know, you know, we know  
I could never live without you

I guess you knew the score  
When you walked out the door  
Without saying goodbye  
I think you're so unkind  
If you leave me behind  
Without giving a reason why

Now I can only imagine how  
Our love should be  
I'm filled with so emotion  
I can't let go ... I won't let go

I know ...  
Loving you is outta sight  
You know ...  
I'm not giving up without a fight  
We know ...  
Everything will be alright  
I could never live without you

(Never live without you)

Everything you said was true  
Never ever stopped loving you  
Ever played your silly games  
I can't get enough  
Can't live without your love  
I hope that you feel the same

If you could only imagine how  
Our love should be  
You'd feel so much emotion  
I can't let go ... I won't let go

I know, you know, we know  
I could never live without you ...
