This fear is only the beginning  
All for the loving hand  
Yes I smile and I agree  
It is a good night to shiver  
A good tounge might make it right  
All Ive said above a whisper

There is a sorrow to be desired  
To be sorrows desire

What they say is true  
It is a dirty blue  
This color around you  
Your curled up warm  
In your own little corner of Sodom  
Did you agree to believe  
This fall has no bottom

There is a sorrow to be desired  
To be sorrows desire

All we move by the book of numbers  
Im held together by string  
li hear not the voices of others  
The bells of Leuven ring  
Fear not the faces of brothers  
Ive come apart it seems

I see not the faces are covered  
Im in your amber ring  
Your amber ring
