I can see my fantasy I'm so consumed in bed  
What I see takes over me I'm blind beyond repair  
It takes a hold of me so tight a breed that does not give  
And when she's done she throws me out like junk left in  
a shelf

Yeah

I wanna have the right

I wanna feel the night

Around the stars

Wanna take a flight

Get back on my sights

Around the stars

I can see all my words I can feel the warming breeze

I can see through forests I can hear her breathe

Walking for a thousand miles I can see the road

and at the end i find I'm with her sharing eachs soul

Yeah

I wanna have the right

I wanna feel the night

Around the stars

Wanna take a flight

Get back on my sights

All round the stars

Walking a solo ride

trying to reunite

God I'm so mixed up

I will find you

I wanna have the right

I wanna feel the night

Around the stars

Wanna take a flight

Get back on my sight

Around the stars

Yeah

I want to have the right

God I want to feel the night

Around the stars

I want to have the right

I want to feel the night

Around the stars
