They came across the mountains  
They came to tame the land  
But there were no more fountains  
Just dunes of hottest sand

You are... you are crucified division  
You are... you are the crucified division  
You are... you are crucified division  
You are... you are the crucified division

They hungered for surviving  
For hail and ideals great  
But oh they were just diving  
Into pain and hate

(X2) You are... you are the crucified division  
You are... you are crucified, crucified  
You are... you are the crucified division  
You are... you are crucified , crucified

No soul on dusty ground  
No life was there awaiting  
Just bones of men are found  
No feelings generating

(Soundclip: One of more than 700 rebels and their  
followers surrendered to the governments' side.)

You are... you are the crucified division (echo)  
You are... you are crucified division (echo)  
You are... you are the crucified division (echo)  
You are... crucified division (echo)

Here in my heart  
Here in my heart
