Howling voices through the night
Sneering at a starving child
Taunt is their only emotion
Tremendous laughters in the cold

(Turns off pain)

A frozen landscape
Killed all kind of man
Steel and meat
Grow out of the earth
Ths signs to follow
Are the signs to recognize
Do I want to live here?
Do I want to stay alive?
Sometimes I ask for meaning
Can you imagine what it's like?
Can you imagine what it's like?
When it turns off pain
(Turns off pain)
When it turns off pain

A broken goddess, inattentive
fowling lean, betrayed by youth
Our fortress struggles in suffocation
Sanguaned by the mob, it scents the blood
Opress the slaves, they're pagans still
The swamp seems deep
They're traitors everywhere
In rags we stand before the golem
The golem we trust, the golem of lust
In rags we stand before the golem
The golem we trust, the golem of lust

That's for you lover, don't be alarmed
That's for you lover, don't be alarmed
That's for you lover, it turns off pain
Do you think it does really
When it drives you insane?
That's for you lover, it turns off pain
Is it as real as it turns
(Turns off pain)

A broken goddess, inattentive
fowling lean, betrayed by youth
Our fortress struggles in suffocation
Sanguaned by the mob, it scents the blood
Opress the slaves, they're pagans still
The swamp seems deep
They're traitors everywhere
In rags we stand before the golem
The golem we trust, the golem of lust
In rags we stand before the golem
The golem we trust, the golem of lust

I don't believe the words I hear
And I won't believe the words you speak
To rule this world
To rule is to lie
No goddess I don't believe
No goddess I don't believe.....
No I don't believe
No I won't believe you

That's for you lover, it turns off pain
Do you think it does really
When it drives you insane
That's for you lover, it turns off pain
Is it real as you feel again

No
I don't believe
I don't believe
I don't believe
No
