Altered smell of blood solid spoiled human race faith is  
wrapped in plastic  
Bags overrated live disgrace sitting on electric chair  
grey skies swallowing the land  
We will get back what we've made falling in the  
deepest grave harmful vapors  
Burn the air infiltrating lungs and veins crucified global  
mesh frozen blood and  
Burnt flesh radiant darkness slaughtered eyes surtax  
suture acid cries fake  
Existence vomit lies another mother fucker rise people  
tortured mortal sins  
Deepless thoughtless evil scream target ruined bone to  
skin tell me what  
To believe in tamped rotten butcher knife murder toxic  
hateful lies fingers triggers  
Pushed to core tell me why we are living for crimson  
outcast freezing cries  
Rabies dog hound frenzy bite middle face left to  
disgrace tell me why we fuck this place
