VERSE 1

Wake up now
To see your way out
You've overstayed your due
Forever now
It's a seasonal bow
That paces its way through

A race into the city
Floating down a river that runs
A winding spirit
Or the thought of cooling off
In the blazing sun

PRE-CHORUS

So now you come see it
Dripping off your thumb
Wait till your power
Turns into a flower
You're stoned

VERSE 2

Wake up now
To free your way out
The doors are closing on you
Escape what you thought you might have
That leaves a trail of clues
A vision into the future
Blinding all the weary past
Don't forget
You live life once
Live it up while you can

PRE-CHORUS

So now you come see it
Dripping off your thumb
Wait till your power
Turns into a flower
You're stoned

CHORUS

I wanna breathe
I wanna see it come out
From underneath
Oh
I will indeed
I will see it in my dream
To kill the disease

CHORUS

I wanna breathe
I wanna see it come out
From underneath
Oh
I will indeed
I will see it in my dream
To kill the disease
