Heard it on the news today that you've been after me
for a while
I couldn't hide my pleasant feelings I couldn't hide
my smile

I've tried to give everything when you where
searching for the one
but after all it's not that easy when love has come
around

I can try - I can try - try to live my life with you
I can try - I can try - try to live my life with you

I live my life like common people-I live my life on my
own.
but ever since the day I met you - you've turn my life
upside down

I've tried to give everything when you where
searching for the one
but after all it's not that easy when love is come
around

I can try - I can try - to live my life with you
I can try - I can try - to live my life with you

Ohhh I can try - to live my life with you

I can try - I can try - try to live my life with you
I can try - I can try - try to live my life with you

I can try - I can try - try to live my life with you
I can try - I can try - try to live my life with you
I can try - I can try - try to live my life with you
I can try - I can try - try to live my life with your
