[Sample]

The heart is the general, the eyes are the scouts
the fists are the arrows, the body is the bow
All movements have to be....

[RZA]

I'm the 7 in the center of the sun, I keep shinin
My inner light would turn my baby's tear drop to small
diamonds
That be twinklin, while my love be sprinklin
We stay young while your old wicked faces be wrinklin
ALLAH's the most gracious, he made the universe the
most spacious
Seen and heard in all places, but still appear faceless
Embraces all races, all caste and all cases
In every spec of life he's the substance of all traces

[Break]

The answer to all questions, the spark of all
suggestions
Of righteousness, the pathway to the road of perfection
Who gives you all and never ask more of you
The faithful companion that fights every war with you
Before the mortal view of the prehistorical, historical
He's the all and all, you searchin for the oracle
A mission impossible, purely philosophical
But you call him on your death bed when you layin in
the hospital

[Break]

And as you play all day like the grasshopper who work
and toil
Like armies of ants carrying stones of soil
Building a home for themselves and storing food

At night we praise ALLAH and adore the moon
In sync like the flow of the Nile, the growth of a child
Only fearin' GOD, we great a ghost with a smile
That which is spirit is spirit, which is flesh is flesh
Meaning life has no partnership with death
