Roll the dice
play your cards
break the rules
thats thats who you are
whoever said play it safe never played the game (never
played the game)
so many players
too many pawns
too many judges saying whats right or wrong
let them jump into the fire if they want to play (want to
play)

Cuz its a deadly game
we play as we live our lives
Deadly game
When we say what is on our minds
Deadly game
play it now before the game is over

two simple rules the devil hands us
make your mistakes...
but no second chances
every time that you stand up is a nother chance to fall

Cuz its a deadly game
we play as we live our lives
Deadly game
When we say what is on our minds
Deadly game
play it now before the game is over

(ha ha ha)

aquired money once again AZ
firm style back in effect
Lets do this
new regime
each one teach one
take time to read some
the young speed one
money that buys the wheat one

where we from the coast trees you keep one
if not it will be your lungs that bleats one
repeat none most statics that meet one
lost until eternal sleep comes
all are black holla back
no burns no concerns straight away no turns

judgement day causin no markers
how the hell its getting darker
as they carry you away you wonder what went wrong
(what went wrong? what went wrong? what went wrong?)

Cuz its a deadly game
we play as we live our lives
Deadly game
When we say what is on our minds
Deadly game
play it now before the game is over
Deadly game
its a deadly game we play with our lives
Deadly game
see whats on our minds
Deadly game
play it now before
