I'm so lost, I'm so deep in this
Looking out for someone, to be in the arms of someone
Get away! Sorrow don't come 'round
Go find someone who don't know what you're about,
and

Where are you now my peace and
How could you leave like this and go

Chorus:
Way Up In Heaven?
Way Up In Heaven

Do you think that I've past the test now?
Maybe paid my dues and somehow earned good news,
and
Could I have some better luck now please?
Oh this is my life we're talking, somebody teach me
smiling

Where are you now my joy, and
How could you leave this world and go

Chorus:
Way Up In Heaven?
Way Up In Heaven

How's it gonna be? Will you build your house and let it
Set like cement and build the foundations on rock?
Or is it gonna shift, just like the sand that runs out
Of each piece for the building, and ends up swirling
sweeping down

Into the blindest whirlpool
Instead of reaching upwards

Chorus:
Way Up In Heaven
Way Up In Heaven
Way Up In Heaven
