The twilight to the fields of redemption  
A vast darkworld namely exothaernium  
Stractus for the growth and propagation  
Magnifiable sphere of conception

Reform thy osperm's hibernation  
Scattered in the fungal upper regions  
Struggle for the aenima restoration  
Enhancing your cryptic camouflage

Enfold your orts, bloom's of death  
Unpleasant inborns, towards the fadding sun  
Leaves if grimness, regio aetherea  
RADIX IPSUS DE NATURA PERPETUA

Living human-vegetable forms  
A landscape of cylindrical greenness-tree's stomach  
A long journeys in chlorophyllic energy  
Before the first necro-organisms appeared

Enormous forest of non-reflection  
The gardens of the insane renovation  
Substratum's of an exotic population  
The most grandiose period of consolidation  
The vast greenland of equilibrium forest  
Homo-botanicus, circle of dilapidation
