Don't look for me when your eyes can't see
Don't sing for me when your soul can't breath
Don't dance with me when your mind ain't free
Because I'm happy now
So don't ask me now - or ever
I'm happy now
So don't ask me now - or ever

What planet are you from
How is it that they speak
She said where do you come from
So don't bother me

Don't ask me why we live then die
Don't ask me why we smile then cry

Because I don't know how
So don't ask me now - or ever
And I'm happy now
So don't ask me now - or ever

What planet are you from
How is it that they speak
She said where do you come from
So don't bother me

Don't leave me down here in the dark
Don't tell me happiness ain't far, it ain't far
Don't leave me hanging on too long
And tell me that I won't fall far
I won't fall far

What planet are you from
How is it that they speak
She said where do you come from
So don't bother me
