January 16th 1977 it's early morning in the utah state prison

The importance of the tv crews enhance this main event

Capital punishment has not been practices in over 10 years in the united states

Though adding to controvercy... Harry Gilmore was bout to enter a vail of trouble

X-ecutioner

Oh year strong survive

You could run but no man is safe

Hey keep the show crews running

Like they're supposed to

Is very simple and fun.

All it takes is good balance and good hand eye co-ordination

Keep your eyes at the balls at all times

Remember practice practice practice

Let me show you how to do it properly
