Uncommitted  
Uncommitted  
Uncommitted  
Ey, ey

It was all a dream  
Reality was far from the safe picture  
She painted for me  
She told me I was the one and I believed  
Until the dream dissipated so suddenly

I don't know why she was so compelled to leave  
Something was messin' with her psychology  
I'm confused, she's sayin' something's wrong with me  
But how can I fix something I cannot see

She said, you're not ready  
Baby, you're not ready for the real thing  
She told me that I'd be unfaithful and I cannot believe

She said you can't be committed  
I said baby I don't really get it  
She said you're not the right type only good for one  
night  
You never stay committed to me

How could this be, she's telling me  
I will never let her be my everything (OK)  
She said I'm a player and I'll never change  
I feel that I'm ready to leave again

She said she could never trust a player like me  
But baby that was part of my history  
She's telling me breaking hearts is a part of me  
It's like it's in my system and it would never leave

She said you're not ready baby you not ready for the  
real thing  
She told me that I be unfaithful and I cannot believe

She said you can't be committed

I said baby I don't really get it  
She said you're not the right type only good for one  
night  
You never stay committed to me

She said you can't be committed  
I said baby I don't really get it  
She said you're not the right type only good for one  
night  
You never stay committed to me

I'm committed

Uncommitted, I'll never admit it  
And then I'll never get it but somehow she could be  
right  
Uncommitted, I'll never admit it  
And then I'll never get it but somehow she could be  
right

She said you can't be committed  
I said baby I don't really get it  
She said you're not the right type only good for one  
night  
You never stay committed to me

She said you can't be committed  
I said baby I don't really get it  
She said you're not the right type only good for one  
night  
You never stay committed to me
