The blue cloud of doom  
Fell upon my land  
Felt upon my sword

Beheading for a feast  
Our swords covered with blood  
Beneath the melting sun  
The praise is for pagan lords  
Returning from the hunt  
Our village was set afire  
The females screamed for help  
The sand-demons have scarred our sacred land

Ashes and smoke were left  
To remind us of failure  
The women had been stained  
By the rodents of the desert  
Carriers of the disease  
Left for us to find

We must please Satan attack the rodents of the sands

Battle...

Swallowed by the sand

The land was fully conquered  
But the desert could not be owned  
They slithered to the core  
To praise Yahweh at nightfall  
The children had been taken  
Their juice sucked into the sand  
The sun reflected their blood  
Fluids consumed by the rodents below

The blue cloud of doom  
Fell upon my land  
Felt upon my sword
