Sugar sweet, if only they all knew

Jam, can't spread no more you've took my bread

Energy, just work, no rest or play

Me, myself I'd rather be alone again

So you can do what you like (Do what you like)

No need to ask me (Do what you like)

Do what you like (Do what you like)

No need to tell me (Do what you like)

Cherry pie, you're not as cute as me

Ice, could never be as cold as you

Recipe, you stir me up inside

Me, myself I'd rather be alone again

Chorus x 2
