Cape canaveral florida, ready for takeoff stages  
Zoom destination an isolated planet mars  
On which observed many relics of past ages  
On return despite rocks no spars

2nd destination world's largest planet jupiter  
From there obtained some ancient relics  
When returned at base -- we want hoopiter!  
And we would like some fancy cow's milk

3rd destinations many ringed planet saturn  
While there darted among the rings  
At base had a few thoughts of astral matter  
Again at base a welcoming with sings  
4th zoom destination to an isolated planet neptune  
Whose surface was clear of any vegetation  
At base quote -- would like large dirigible balloon  
During when there was no hesitation

5th zoom destination smallest planet pluto  
On which there are many beautiful sights  
It has no vegetation you know  
No power to illuminate dark nights.
