Let Your Heart Go Free X5

There comes a time in everyone's life  
When things don't go the way you planned it  
But don't you know,  
You take the blow it all works out  
There comes a time when all that you want  
Just sails away, goes down the river  
But don't be sad, cause all of that just disappears

Ooh let your heart go free  
Let your spirit soar into the night  
Let your soul take pride  
All you wannabe  
Let your heart go free

Ooh let your body rise  
Make your journey last until all time  
When you see the sign  
It's your destiny  
Let your heart go free

Let Your Heart Go Free X3

If every step is taking you back  
And never see away around it  
Just close your eyes and realise it's not too late  
If every dream is shattered in two  
You'll find away to pick the pieces  
Just lift your hands and understand it's up to you!

Ooh let your heart go free  
Let your spirit soar into the night  
Let your soul take pride  
All you wannabe  
Let your heart go free

Ooh let your body rise  
Make your journey last until all time  
When you see the sign  
It's your destiny

Let your heart go free  
Let heart go free

Everything is you, everything you know  
All that time you work, people on the go  
Looking for a rewind, All in what you see  
Nows the time to work, Let your heart go free!

Ooh let your heart go free  
Let your spirit sore into the night  
Let your soul take pride  
All you wannabe  
Let your heart go free

Ooh let your body rise  
Make your journey last untill all time  
When you see the sign  
It's your destiny  
Let your heart go free  
Let heart go free

Everything is you, everything you know  
All that time you work, people on the go  
Looking for a rewind, All in what you see  
Nows the time to work, Let your heart go free!
