Landon's Summer Diary

I have friends, that I haven't seen since,
I can't remember when, that I hold dear to me,
and I wish that I could spend a lot more time with them,
but I won't pretend that will happen.

I've got family, that I try and call at least,
once or twice a week, that mean the world to me,
And I hope I get some time with them eventually,
but I guess we'll wait and see.

Cause I've been falling apart, always wishing I was
there.
Holding you in my heart, and I can't seem to,
let go of the things that mean the most to me.
And now I've spent so much time doing things I never
could,
and I know that you're proud, but I can't seem to,
let go of the things that mean the most to me.
You mean the most to me.
You mean the most to me.

I met a girl, who doesn't care about, my name and
never would,
who understands me like nobody ever could.
Now I'm counting down til I get back to her.

So why can't I, just focus on the things that matter in
my life?
I feel distracted like I'm wasting precious time,
that I'll never get back,
but I'm looking left and right,
finding myself off the track.

Constantly reminded of the life that I am missing,
and I can't thank you enough for holding on to me.

Cause I've been falling apart,
always wishing I was there.
Holding you in my heart,

and I can't seem to,
let go of the things that mean the most to me.
And now I've spent so much time,
doing things I never could,
and I know that you're proud,
but I can't seem to,
let go of the things that mean the most to me.
You mean the most to me.
You mean the most to me.

Whether you're a best friend or a lover,
a father or a brotherâ€¦
Our love for one another,
will guide this heart back home.

Cause I've been falling apart,
always wishing I was there.
Holding you in my heart,
and I can't seem to,
let go of the things that mean the most to me.
And now I've spent so much time,
doing things I never could,
and I know that you're proud,
but I can't seem to,
let go of the things that mean the most to me.
(Fallin apart, Fallin apart, Fallin apart x2)
You mean the most to me.
You mean the most to me.
