Gather around me
I need some time to recollect these thoughts of mine
You're so kind to stand behind me
Help me face these fears I've build over the years
It's so clear

You're always here
(I wouldn't leave you here like this)
And I'm desperate, oh so desperate to feel alive, youre
so kind
(You need someone to help you, please let me guide
you through this)
To offer assistance in my interest
Well I could've never made it through the night
Its alright

Cause we saw this coming through
And I'm still here

Keep me here I believe
Finding faith you must agree
Upon a state of action
Keep me posted, still in action
I'll keep you here cause I believe
Finding faith is what I need
To take the chances I must take
Before my heart begins to break

I know you have it hard sometimes
Don't let the bad things rule your life
Sit back and watch your life take flight
You're just so young, you have the time
The time

Just leave it alone
Just leave it alone
Just leave it alone

Keep me here I believe
Finding faith you must agree
Upon a state of action

Keep me posted, still in action
I'll keep you here cause I believe
Finding faith is what I need
To take the chances I must take
Before my heart begins to break

Before my heart begins to break

Thanks for being here my friend
(Thanks for being here my friend)
Here with me, 'til the very end of time
We're gonna do this one together

Thanks for being here my friend
(Thanks for being here my friend)
Here with me, 'til the very end of time
We're gonna do this one together

Thanks for being her my friend
We're gonna do this one together
Thanks for being here my friend

Keep me here I believe
Finding faith you must agree
Upon a state of action
Keep me posted, still in action
