

## Ari "Weird Science"

Visit "[Weird Science](#)" on [MotoLyrics.com](http://MotoLyrics.com)

the chemistry of your interior  
bio of your exterior  
baby I can't define it  
so I call it weird science  
you're my perfect creation  
built just for my stimulation  
baby I can't define it  
so I call it weird science

[verse 1]

I'm lost in the fire  
I'm lost in desire  
I'm melting (I'm melting, come help me, I'm melting)  
spontaneous combustion boy you set me ablaze  
I'm on fire (on fire, come help me, on fire)  
surrender to you boy you got me  
your love is so enticing  
you spark my flame  
you got me screaming your name  
this passion building up inside me  
'til I can't take no more  
I'm 'bout to explode  
(I'm bout to explode)

the chemistry of your interior  
bio of your exterior  
baby I can't define it  
so I call it weird science  
you're my perfect creation  
built just for my stimulation  
baby I can't define it  
so I call it weird science

It's been so long, since I had someone in my life to fit  
that prototype  
(that prototype I been searching for my whole life)  
It's been so long, since I had someone in my life to fit  
that prototype  
(that prototype I been searching for my whole life)

[verse 2]

You're building me up 'til I'm about erupt

cool me down  
(cool me down, feel your love coming down)  
Like lightening done struck  
and drew me to you I'm stuck  
and I don't wanna come down  
don't let my feet touch the ground

connection is electrifying  
I'm like a magnet how I'm on you  
(but you like it, you like it)  
I never was that good in science  
but let's see what our chemistry can do  
I'm losing control over you

The Experiment I'm conducting  
just follow simple instructions  
suspense is killing me I think I'm boiling over  
I'm just testing it babe  
I'm getting restless, oh babe  
and I want you to come a little bit closer

the chemistry of your interior  
bio of your exterior  
baby I can't define it  
so I call it weird science  
you're my perfect creation  
built just for my stimulation  
baby I can't define it  
so I call it weird science

It's been so long, since I had someone in my life to fit  
that prototype  
(that prototype I been searching for my whole life)  
It's been so long, since I had someone in my life to fit  
that prototype  
(that prototype I been searching for my whole life)
