

Scorpions, The "Blood Too Hot"

Visit "[Blood Too Hot](#)" on MotoLyrics.com

(Music: Rudolf Schenker; Lyrics: Klaus Meine)

I came all around the world just to be with you
I've been flying supersonic, between black and blue
I promised I'd be there
And now I'm here and I won't go
Before I give you everything I've got

You left everything behind, just to feel that touch
To join the family of spiders. really means so much
There's a storm up in the air
It's the power we all share
When it runs through our flesh and blood

If your blood is so hot
Stand up and rock with me
If your blood is too hot, rock with me
If your blood is so hot
Stand up and rock with me
If your blood is too hot, rock with me

I came all around the world, like on flying wings
To hear you screaming out for more, still means
everything
Raise your hands up in the air
I swear to you that I'll be there
I swear it, in the name of rock

If your blood is so hot
Stand up and rock with me
If your blood is too hot, rock with me
If your blood is so hot
Stand up and rock with me
If your blood is too hot, rock with me
