Supernatural
Beings managed to
Accelerate the creation of life!
A moment of extasy, love - like orgasm
The passing of semen that brings joy.
Consciousless beings can't realize
That momentary excitement will
Give birth to offespring
...Usually it takes nine months
Of human life...

The cells join each other, they firmly unite
Life is being creating with astonishing pace
Women - clones can feel only a short while
Of pleasure.
The new breed approaches! (NOW!)
Human debris, guts torn apart
Women massacred by supernatural
Breed
The species extincts!
