Hold me in your arms love
Tell me it's alright
Tell me that there's something
Cause to live and cause to die
And tell me that you'll hold me
Till the storm has passed
Till the clouds of want are scattered
And we're free at last

Tell me that we're human
Tell me that we're human
Tell me that you love me

And distances, conditions
Pull true lovers to and fro
Till the soil becomes so arid
That there's nowhere love can grow
For each man kills the thing he loves
And each man has to die
Factory existence lifetime
To the workhouse in the sky

Tell me that we're human
Tell me that we're human
Tell me that you love me

And generation ketamine
Has tranquilised our hearts
Quelled the fire in our bellies
Leaving only a few sparks
There will be nothing left
But individuality
The great mantra of the rulers
But the privilege of the few

Tell me that we're human
Tell me that we're human
Tell me that you love me

(Bridge)

But I hope I am a futurist
Not a relic of past ideas
Cause if we don't make a change soon
I see streams of blood and tears
But we can turn those sparks into
Bonfires that rage
From Cairo to Mardrid
Kill the blood-lust of an age

Hold me in your arms love
Tell me it's alright
Tell me that there's something
Cause to live and cause to die
Tell me that you'll hold me
Till the storm has passed
Till the clouds of want are scattered
And we're free at last

Tell me that we're human
Tell me that we're human
Tell me that you love me
