

## Yellow Second "Space Travel"

Visit "[Space Travel](#)" on [MotoLyrics.com](https://MotoLyrics.com)

I heard a voice last night  
It said wake up and open your eyes  
Wake up walk out tonight  
Cause she don't care if you're dead or alive, dead or  
alive  
She moves like beams of light  
Straight through this universe in my head  
Where I get peace of mind  
I'm free from the stupid things that I said  
She's all in my head

[Chorus]

Did I get lost while I was gone  
I traveled space for much too long  
But there's a planet I have found  
And you are far away from now

Somewhere behind her eyes  
Some super natural energy  
Takes me for quite the ride  
Across time  
Where I defy gravity  
As soon as a dream

[Chorus]

Did I get lost while I was gone  
I traveled space for much too long  
Did I get lost while I was gone  
I traveled space for much too long  
But there's a planet I have found  
And you are far away  
Far away  
You are far away  
Far away from now.
