THE NIPS
"All The Time In The World"

People are always telling me that dreams don't ever
come true
But I don't need to lie now baby, and I just think of you
All the time, all the time
So lie on your back and think of England and I'll put my
hands on you
I've been dreaming on your picture, baby, creaming
over you
All the time, all the time

It don't really matter what you wanna say, 'cause I know
that I've got
All the time, all the time in the world to make you mine
All the time, all the time in the world to make you mine
All the time, all the time in the world to make you mine
To make you mine

Now its all over, I'm sorry baby, my brains are in my
pants
You know I've got my eyes on you, I'm looking for a
chance
All the time, all the time
So lie on your back and think of England and I'll put my
hands on you
I've been dreaming on your picture, baby, creaming
over you
All the time, all the time

It don't really matter what you wanna say, 'cause I know
that I've got
All the time, all the time in the world to make you mine
All the time, all the time in the world to make you mine
All the time, all the time in the world to make you mine
To make you mine
Awwwww!

It don't really matter what you wanna say, 'cause I know
that I've got
All the time, all the time in the world to make you mine
All the time, all the time in the world to make you mine
All the time, all the time in the world to make you mine

To make you mine

It don't really matter what you wanna say, 'cause I know
that I've got
All the time, all the time in the world to make you mine
All the time, all the time in the world to make you mine
All the time, all the time in the world to make you mine
To make
