### "Power in the People"

Visit "[Power in the People](#)" on [MotoLyrics.com](#)

like a light piercing darkness we can be the salt on  
earth  
not oppressing those around us but giving every  
human worth  
theres a cloud above the city  
theres oil in the sea  
theres a host of children dying and the blames on you  
and me

but theres power in the people  
in the hands of you and me  
theres power in the people  
in all society

why do we exist? To suffer pain or welcome bliss?  
or to watch the nightly news feeling so emotionless?  
its a helpless state of mind this world has pulled across  
our eyes  
lets fight against the lies, put down our fists raise up  
our minds

but theres power in the people  
in the hands of you and me  
theres power in the people  
in all society

join our hands  
lets make a better plan

and theres power in the people  
in the hands of you and me  
theres power in the people  
in all society  
in all society  
in the hands of you and me
