Today I searched inside of myself
I didn't find a thing
What should I do?
Should I search again?
Dig a little farther?
Look a little harder?

Now I find myself in a big mess
Thinking about the things I said
Is it up to me to fix all of my problems?
Should I live without thinking?
Stop dreaming?
Forgive everything?

I should have been thinking
Should have blamed it on myself
How can I make it up to you?
Sorry I blamed it on you

I know it was all my fault
I know it was all on my side
I blame it on myself
Never should have blamed it on you
I should have taken all the blame

Everything I did
I blamed it on you
What should I do?
Should I forget about the past?
Blame it on myself?
Make it up to you?

Last night I couldn't sleep
I was thinking about all the stupid things I did
What should I do?
Should I ask you to forgive me?
Beat myself up?
Write a song about it?

I should have been thinking
Should have blamed it on myself

How can I make it up to you?
Sorry I blamed it on you

I know it was all my fault
I know it was all on my side
I blame it on myself
Never should have blamed it on you
I should have taken all the blame

Myself, I blame!
Myself, I blame!
I'll take the pain and I will blame!
Myself, I blame!
Myself, this pain!
This blame is pain!
Pain is for my blame!
Blame!

I know it was all my fault
I know it was all on my side
I blame it on myself
Never should have blamed it on you
I should have taken all the blame

I know it was all my fault
I know it was all on my side
I blame it on myself
Never should have blamed it on you
I should have taken all the blame
