These shadows of hate
Are changing my fate
And I can't turn my head and look the other way
The force of them are making me stay
The truth is taking a stab at me
I turned my head and what did I see?

I saw the shadows lurking in the dark
They're here to put me back on the starting mark
Now all the shadows of hate are haunting me

Hide me, save me
Keep them away from me
Hide me, help me
These shadows of hate are after me

So hide me,
So save me
From these shadows of hate

I learned a lesson today
I can't always get my way
The shadows are haunting every night
The only thing I can do now is fight
I can't run or hide
I have to stay along for the ride

I saw the shadows lurking in the dark
They're here to put me back on the starting mark
Now all the shadows of hate are haunting me

Hide me, save me
Keep them away from me
Hide me, help me
These shadows of hate are after me

So hide me,
So save me
From these shadows of hate

Hide me, save me

Keep them away from me
Hide me, help me
These shadows of hate are after me

So hide me,
So save me
From these shadows of hate

Hide me, save me
Keep them away from me
Hide me, help me
These shadows of hate are after me

So hide me,
So save me
From these shadows of hate

They're after me
They're after me
They're after me
They're after me

Hide me, save me
Keep them away from me
Hide me, help me
These shadows of hate are after me
