I hate to break it to you but. You're just a lonely star. I
try to bring you down but. Our level isn't good enough
/ You always do as you please, so I'm going to follow
suit and take a seat.

Watch you fall apart, cause in the end what are you
without me?

/ I'll slow this down cause I know that you can't keep up.
Oh maybe I maybe I was wrong from the start. I might
be proud, but at least I'm proud of something. You've
taken pride in becoming nothing

/ You keep me on the edge of my seat. I bite my tongue
so you don't hear me. I wanna hate every part of you in
me. I can't hate the ones who made me.

/ I'm married to the music, for better for worse. You say
that I'm privileged, but my gift is my curse. I can't recall
the last time someone asking how I was. Last i checked
I was a fucking wreck, I called for help and no one
showed up. So I sit in the dirt

/ You keep me on the edge of my seat. I bite my tongue
so you don't hear me. I wanna hate every part of you in
me. I can't hate the ones who made me

/ Just forget what you've learned. Just forget what
you've heard. The truth should come first. I can't bear
the sight of you anymore. You've become what I hate.
Sold yourself for a bit of fame. Now the wolves have
closed their doors. You wanna drag me down some
more. Fuck you.

/ You keep me on the edge of my seat. I bite my tongue
so you won't hear me. I wanna hate every part of you in
me. I can't hate the ones who made me.
