Come a little closer  
As this night gets older  
Of you I grow fonder  
Just let my hands wander

This is the first thing that i thought  
This is the last thing that I I want  
You were the first one I loved  
You were the first love I lost

Oh

You left it too late  
To change the way I think  
I'll never say never again  
Those words will never pass my lips

This is the first thing I thought  
This is the last thing I want  
You were the first one I loved  
You were the first love I lost

Oh

This is the first thing I thought

Oh

This is the first thing I thought  
This is the last thing that I want  
You were the first one I loved  
You were the first love I lost

I'll never say never again
