The night my lover said goodbye
I saw the moon fade from the sky
Black was the night he left me
Black were the days to come
Oh how I long for twilight time

Somehow, someone in this great somewhere
Could you be the answer to my prayer?
'Cause a miracle happened to me when I met you today
The clouds rolled away, happy twilight time

My God, I never would guess at dawn's early light
Oh on & on rolled the darkness from that night
I guess the darkest hours were just before dawn
Now that you come, oh darlin', it's twilight time

Suddenly the world looks bright
Suddenly there is no night
Because you showed me the way
To cross the bridge from night to day
I'm so grateful that you're mine
I guess I found you, darlin', just in time
All of my heartaches are fadin' with the past
At last, at last it's twilight time

I can see a bright new day
With your love to lead the way
A sweet sunshine now to stay
All of my troubles are fadin' away
Oh darlin', it's twilight time
...& fade
