Can you feel the music in you and me?
And know where far upon I still can hear the melody of
your heart
This is my chance to be with you tonight
Cause wherever you are I know I'm on your mind

Dj would you play a special song for me, for me yeah
So I can dance with the one that's thinking about me,
And keep on playing on, all night, all night, all night
All night, hey, put your hands in the air if you hear it
Cause they playing all night, all night, all night
Play this special song for me, all night, all night
All over the world
Every dj's playing the song you love
And they playing all night.

Thanks to Andrei
