If they gave you the good life,
Would you close your eyes?
Would ya lock out the real world,
No compromise?
You sleep safe tonight.

And you believe it
You think that you need it

Two bullets shy of the free world
Don't kid yourself, it's the real world

So we go with survival
This flag we wave
Our choices made

And we believe it
Think that we need it

Two bullets shy of the free world
Don't kid yourself, it's the real world

And you believe it
Think that you need it

Two bullets shy of the free world
Don't kid yourself, it's the real world
