

Young Love "Tragedy"

Visit "[Tragedy](#)" on MotoLyrics.com

How did we fall so hard, so fast, your blood is all over
the sky
How did we fall so hard, so fast
The current came and washed them all away
The people said the current came and washed them all
away

Floating up above, your fire, I can hear you calling out
for me
Floating up above your tragedy
The current came and washed them all away
The people said the current came and washed them all
away

The people said the current came and washed them all
away
The people said the current came and washed them all
away
The current came and washed them all away, away,
away, away
The current came and washed them all away, away,
away, away
The current came and washed them all away, away,
away
(Hold on)

The people said the current came and washed them all
away
The people said the current came and washed them all
away
The people said the current came and washed them all
away
The current came and washed them all away, away
