### **"Walk With Me Galaxy"**

Visit "[Walk With Me Galaxy](#)" on [MotoLyrics.com](http://MotoLyrics.com)

it all happened at once right out of the blue  
its a thing called thing jealousy inspired from you  
it took a shade of yellow, and my face out of breath  
the color was green, envy was all that was left  
I know its a waste of time, but it's all my watch says  
if I didnt write it away, i'd probably be dead  
you could call me a coward, you could call me weak  
I won't disagree with either, just let me speak  
my pen is the liquid (baby), my paper is the tree  
music is my voice, my thoughts set me free  
you don't have to listen, just don't interrupt  
let me say what I have to say till my time's up  
I don't know if it makes sense, maybe a couple  
quarters  
insanities not my friend, he's just a supporter  
and I'ma give you a call when I figure it out  
but until then stop asking me what my songs are about

come on come on, just sing with me  
it don't matter what it means just sing with me  
come on come on, just dance with me  
it don't matter where we dance just dance with me  
come on come on, just talk to me  
it don't matter what we say just talk to me  
come on come on, just walk with me  
it don't matter where we go just walk with me

it all happened at once right out of the green  
a thing called envy inspired from me  
I stomped it out with a little bit of logic  
thought I lost it, but smiled and called it progress  
I don't really know what this pens trying to say  
but its been speaking to me since the 8th grade  
I got angels writing through me and demons writing to  
me  
and ive seen one too many luis bunuel movies  
and when my TV breaks I'ma stare at the light bulbs  
and look for my angel, she'll be the white moth  
I'ma be that cockroach in a cocoon  
thats gonna come out and be something better then  
you

and all you caterpillars, trying to be butterflies  
you'll get your wings, but you'll fly like the other guys  
and I'ma give you a call when I figure it out  
but until then stop asking me what my songs are about

come on come on, just sing with me  
it don't matter what it means just sing with me  
come on come on, just dance with me  
it don't matter where we dance just dance with me  
come on come on, just talk to me  
it don't matter what we say just talk to me  
come on come on, just walk with me  
it don't matter where we go just walk with me

come on come on come on little lady  
I'ma take you to this place where the lakes are gravy  
the rivers are wine and the clouds mashed potato  
you could chase your dreams and your friends won't  
say no  
god is not a doctor and your prayers aren't hospitals  
all you got is thought your bodies not an obstacle  
the colors are ten times your eyes could imagine  
and the happiness is nothing cartoons could fathom

(Amber)  
it's fantastic, it's fantastic  
the place is fantastic it's my reality  
put away your telescopes it's not in this galaxy
