

## 2PM "Be With You"

Visit "[Be With You](#)" on [MotoLyrics.com](#)

This slightly trembling moment that I (waited for a long time)  
You don't know how long I've waited, do you (I know everything you want it too)  
Your warmth at my fingertips, your scent all over my body, baby  
Something endlessly intense like this deepening night

I just wanna love you know that I want you  
So that I could be next to you (come to me oh)  
No one can replace you  
I just wanna be with you  
I just wanna be with you my love

When your silhouette slowly comes closer I (take it slowly my baby)  
Little by little my heart is overwhelmed (I know everything you feel it too)  
The shivers from your fingertips, your silhouette, your whisper, baby  
Open all of your heart to me

I just wanna love you know that I want you  
So that I could be next to you (come to me oh)  
No one can replace you  
I just wanna be with you  
I just wanna be with you my love

Your fragrant smile and that scent  
Make me drowsy and helpless  
Your sweet voice and those gestures  
Make me soft and tender the most in this world  
My all sensations are moving at your fingertips  
I'm getting closer to you without even realizing it  
From now on I want to make love that cannot be expressed in words  
I want to know you better until the candles go out

I just wanna love you know that I want you  
So that I could be next to you (come to me oh)  
No one can replace you  
I just wanna be with you  
I just wanna be with you my love
