Come back when you hear this song
Come back when you hear this song

I didn't know when you were with me
I didn't know even after you left
But after time passed, I finally realized

No matter who I met
I kept thinking about you
So I kept getting scared
Because it seemed like a mistake to let you go

What do I do? After all this time
I am regretting that I let you go
I'm not confident that I can change your mind after making you cry but
Give me one more chance

Come back when you hear this song
Come back when you hear this song
Come back when you hear this song
Wherever you are, whoever you're with

I'm sorry so come back
I'm regretting so come back
Come back when you hear this song
Wherever you are, whoever you're with

How far did you go?
Did your heart already turn around?
Your heart that was hurt because of me
Did it harden?

What do I do? After all this time
I am regretting that I let you go
I'm not confident that I can change your mind after making you cry but
Give me one more chance

Come back when you hear this song
Come back when you hear this song
Come back when you hear this song
Wherever you are, whoever you're with

I'm sorry so come back
I'm regretting so come back
Come back when you hear this song
Wherever you are, whoever you're with

Baby stop - come back to me, you know I only have you
I know I did you wrong, you're right
As soon as you left me, this longing grew and my emotions rose up
Now I only know you alone
I don't know why I didn't say this for all this time
I'm sorry and I love you

Come back when you hear this song
Come back when you hear this song
Come back when you hear this song
Wherever you are, whoever you're with
