"Finest Wine"

Visit "[Finest Wine](#)" on MotoLyrics.com

Know that we got only a little time so like it or not,
we gonna be drinking wine
no need to stop, till we see the sunshine
start at the top, till we ease our worried minds
Know that im lost with out you
think of the cost of what you do
to me you really mean something
running away will fix nothing
im begging you please reconsider
with you here life is much better
know that i'll wait until im old and gray
just to see your face again
know that i'll wait until im old and gray
just to see your face again
Know that im watching, every minute
know what the clock says, but im not finished
thinking of stopping, to rest our weary heads
the only option, thinking of times we've had
Bring me a glass of your finest wine
i want to dance, till the morning time
bring us some food, got to feed our minds

drink and laugh till we feel right
i'm just to blind to see the sign
we're losing what we've made
know that ill wait until im old and gray
just to see your face again
know that ill wait until im old and gray
just to see your face again
Bring me a glass of your finest wine
i want to dance till the morning time
bring us some food, got to feed our minds
drink and laugh till we feel right
we're losing what we've made
know that i'll wait until im old and gray
just to see your face again
know that i'll wait until im old and gray
just to see your face again
know that i'll wait until im old and gray
just to see your face again
