The way I act towards you will never change  
As long as you stay the same  
You look down on me as if I have no friends  
But who are you to judge me any fucking way  
So meet me at the corner after school  
I go there and find nothing of you

You say you wanna fight me  
You say you want me dead  
Well I'm not scared of you  
Or your fucking friends  
You think you're the coolest kid at school  
But you're just a wigger who thinks he's cool  
So meet you at the corner after school  
I go there and find nothing of you  
I, I think you're a joke, a fucking joke
