well i've been around the country and i've met a lot of kids some kids are smart and some kids are dumb but i don't pass judgement they're just having fun some kids get fucked up and others refrain but that's what makes the world so great no one should be the same the kids of the future you can see it in their eyes they must overcome nationality if the world is to survive and we'll sink with california when it falls into the sea oi i'm not from england, je ne suis pas de france ich bin nicht von deutschland and i can't dance well i could saay california it means nothing to me. i despise nationality shouldn't say that you're from north, south, east or west it's humanity that is the best yo no soy mexico, no sano de italia that's all the languages we know and actually we're from canada yes we loe to travel, but we love to see that california border, forever and a day we'll sink with california when it falls into the sea from the mountains, to the prairies from the desert to the sea i'd say california, it means nothing to me i despise territoriality i don't care if you're from north, south, east or west live for humanity, forget the rest. yo i'm not from new york, i'm not from boston y'all i ain't from texas and i'm not patriotic cause the only patriotism that we really need is to sink with the world, with humanity and me
